technical specification

Thickness	:	1.00mm to 1.50mm
Standard Sizes	:	1220mm X 2440mm
Range	:	Rang PVC Laminates come in a wide range of design, colours and finishes.
Adhesive	:	Rang PVC laminates are easy to apply with the standard laminating system, including most of the conventional water and solvent based adhesives normally used with plastic laminates. We DO NOT recommend the use of heat activated adhesives.
Lamination	:	Proper substrates must be used and careful bonding procedures must be observed. Substrates should be of good quality plywood, PVC Board, high density particle board or good quality fiber board. The face of the substrate must be smooth and free of grease, wax, dust, chips and other foreign matter. We DO NOT recommend any kind of coat like PU base, melamine, lamination (wax) on our products.
Cutting & Machining	:	These PVC laminates can be cut by using sharp diamond blade cutter only. We recommend the use of smooth file to feather all corner edges.
90° Bending	:	You can simply use V-Groove Cutter by giving a groove of 0.3 mm to 0.5 mm for bending the sheet up to 90 degrees. For any difficulty please contact Rang.
Maintenance	:	Any cleaning agent containing acids, alkalis or abrasive should NOT be used to clean the laminate. Exposure to sunlight should be avoided.
Note	:	Rang warrants that all its products are free from manufacturing defects and perfectly fit for use in normal conditions. In case of any claim, the liability the company's is however limited to the cost of the product only. There may be batch to batch colour variation. The sample swatches only represent the designs, colours and finish. They do not represent the actual thickness.

KINDLY REMOVE THE PROTECTIVE FILM WITHIN 7 DAYS OF INSTALLATION OF LAMINATES.

Disclaimer : The laminates in the catalogue may differ in colour from the original laminates.

The laminate colours may vary with every new batch of production.
